# Market Problems:

- Quality vs. Convenience Trade-off: Consumers often choose quick and convenient fast food, sacrificing quality and health in the process.
- Limited Availability of Fresh & Healthy Options: Many individuals struggle to find fresh, nutritious meals that suit their hectic lifestyles.
- Lack of Variety in Choices: A lot of food delivery services fail to offer a diverse range of healthy or specialty meal options.
- Taste and Freshness Concerns: Pre-packaged or ready-to-eat meals often fall short on taste and freshness, leaving consumers unsatisfied.
